

Event Reminder

PRODUCT GUIDE

Every birthday. Remembered.

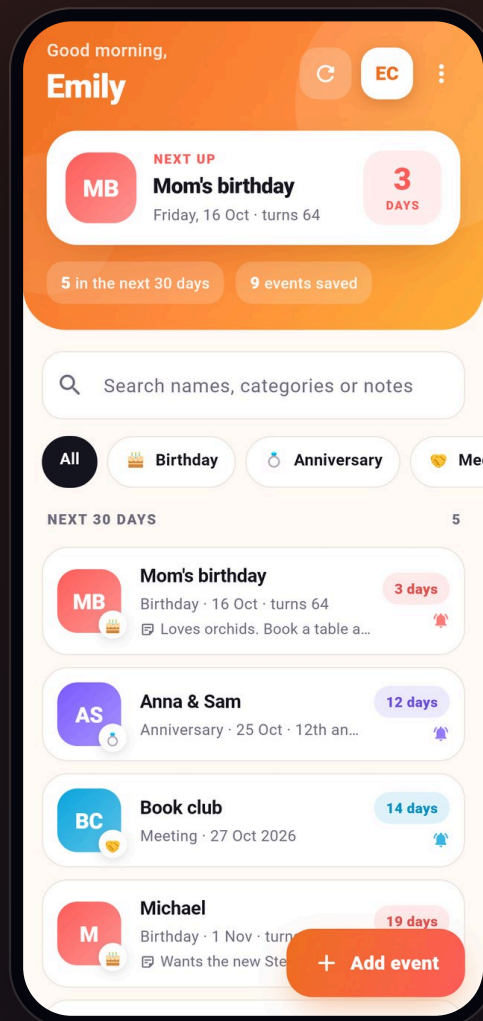

Event Reminder keeps the dates that matter: birthdays, anniversaries and every special day. You get a reminder days ahead, so there is always time to celebrate.

Free for iPhone and Android

Reminders work offline

— AT A GLANCE

Never miss a special day, **without thinking about it.**

Add the days you want to remember, choose how many days ahead you want a reminder, and Event Reminder does the rest. Big friendly countdowns show what is coming up, and your phone delivers each reminder on time, even without an internet connection.

Every kind of day

Birthdays, anniversaries, meetings, holidays: add any date you want to remember and sort it into a category.

Reminders ahead of time

Get a reminder 1 to 30 days before each day, so there is time to plan, shop and celebrate.

A photo for every face

Add a photo to an event and it appears in your list and in the reminder itself.

Yearly or one time

Birthdays come back every year by themselves. A one-off appointment is reminded once and then left alone.

Notes and gift ideas

Keep a note with each event: gift ideas, what they like, or what you did last year.

Face ID and fingerprint

Sign in with a glance or a touch. Your events stay safe on your account and come back on a new phone.

Find any day fast

Search by name, category or note, or tap a category chip to see only one kind of day.

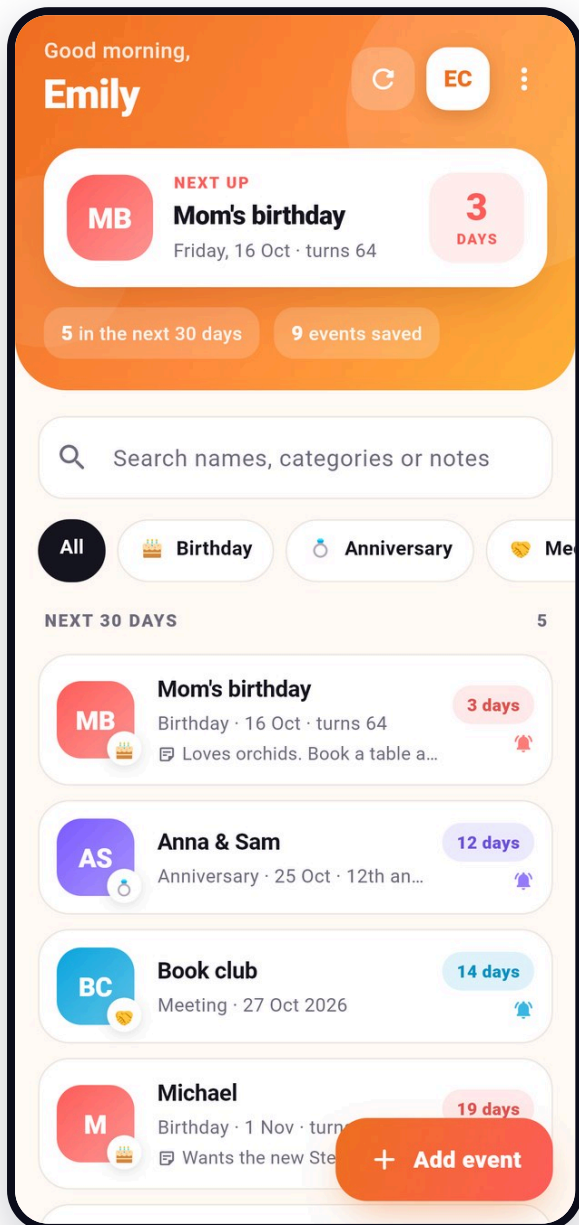

Edit or delete in a tap

Tap an event to change it, press and hold for the quick menu, or swipe it away. Every delete asks first.

— THE HOME SCREEN

Your upcoming days, **with a countdown.**

The home screen puts the next event first, with the number of days left and the age or anniversary it marks. Search, or filter by category to see only birthdays, anniversaries or work dates.

Your upcoming days

What you see

- ✓ **Next up** with a large countdown to the closest day, and how many days fall in the next 30.
- ✓ **All your events** in date order, grouped as Next 30 days, Later and Passed, each with its category, photo, notes and days to go.
- ✓ **Search and category filters** to find any day at once.
- ✓ **Quick actions:** tap to edit, press and hold for Edit or Delete, or swipe left to delete.
- ✓ **An Add event button** to add a day in a few taps.

Reminded in good time

Each event has its own reminder: 1, 3 or 7 days ahead, or any number up to 30. Your phone schedules it itself, so it arrives on time whether you are online or not.

— ADD A DAY

A name, a date, and a photo if you like.

Adding an event takes a few taps. Everything except the name and the date is optional.

- 1 Tap **Add event** on the home screen.
- 2 Enter a **name**, choose a **category** and pick the **date**. You see at once how many days away it is.
- 3 The category sets the colour: birthday, anniversary, meeting, holiday, personal, work or other.
- 4 Choose whether it comes back **every year** or happens **once**.
- 5 Set how many **days ahead** to be reminded.
- 6 Add a **photo** and a **note**, such as a gift idea, if you like.
- 7 Tap **Save**. The reminder is scheduled on your phone straight away.

Edit or delete

Tap an event to change anything. To delete it, use the bin at the top of the edit screen, press and hold the event, or swipe it to the left. You are always asked to confirm, and deleting an event also removes its photo and reminders.

Edit event

Name

Mom's birthday

Adding an event

— YOUR ACCOUNT

Quick and secure sign-in, and your data is yours.

Create a free account with your e-mail address. Your events are kept safe on your account, so they come back on a new phone or after a reinstall.

Sign in your way

Use your e-mail and password, or turn on Face ID or fingerprint sign-in for a touch. Forgot your password? Reset it from the sign-in screen: the link works once and for one hour.

Profile and settings

Change your name, manage biometric sign-in, sign out, or delete your account if you ever want to. **About** in the menu shows what the app does and who makes it.

PRIVACY

Your dates are yours. **Nobody else's.**

Event Reminder is made by Jesora Labs, an independent studio. We make our money from good apps, not from your data.

No ads, no tracking

No advertising, analytics or tracking tools in the app.

Reminders stay on your phone

Reminders are scheduled on your device, not delivered by a server.

Delete everything, any time

Delete your account in the app and your events and photos are removed for good.

QUESTION	ANSWER
Are there ads?	No. There is no advertising in the app.
Is anything tracked?	No analytics or tracking tools are built into the app.
Where do reminders come from?	Your phone schedules them itself. They are not sent from a push server, so they work offline.
Can I delete my data?	Yes. Deleting your account in the app removes your events and photos for good. You can also use the delete-account page on the website.
Where can I read the policy?	eventreminder.jesoralabs.com/privacy
